What Works for Health Curated Strategy Lists

What Works for Health Curated Strategy Lists are helpful resources to support community change efforts around specific topics and themes. Selected by our expert evidence analysts, each list includes evidence-informed programs, policies, and systems changes that can help address complex health problems, systemic social issues, and local community needs and priorities.

Explore Curated Strategy Lists

**COVID-19 Recovery**
Evidence-informed strategies that help communities respond to and recover from COVID-19. These interventions address income, education, housing, and more based on a framework for health equity.

See the list ›

**Climate Change**
Evidence-informed strategies that help communities reduce greenhouse gas emissions and mitigate the effects of climate change, including options for individuals to reduce their carbon footprint. These interventions address transportation, energy efficiency, sustainable food options, stewardship, waste reduction, and more.

See the list ›

**Violence Prevention and Community Safety**
Evidence-informed strategies to prevent neighborhood crime and violence as well as intimate partner violence, based on an ecological framework. These interventions address collaborative efforts between law enforcement and community residents, and connect families and youth at risk with social services and supports.
